Article 08 October 2015

On 2 October, the European Commission presented European Union-funded training packages for health professionals aimed at improving health services for ethnic minorities and migrants in Europe, at a workshop in Brussels.

Developed by academic institutions from Denmark, Italy, the Netherlands and Spain the training packages have been tailored for front-line healthcare professionals and includes modules specifically developed for the Roma population. The final training package is expected to be available in January 2016.
