Associate editors

Magnus Boman, Royal Institute of Technology (KTH), Stockholm, Sweden

Magnus Boman is a professor in Intelligent Software Services and an expert in artificial intelligence, data science and statistical learning theory. He is currently building learning machines for analysing patient behaviour in a clinical flow of Internet-based psychiatry patients. Over the last dozen or so years, Boman worked as a computational epidemiologist in Sweden and the United Arab Emirates, chiefly with influenza-like illnesses. He spent 4 years as a foresighter for the European Commission, where he analysed the role of information technology cross-industry and over many areas, including active healthy ageing and precision medicine.
Mike Catchpole, European Centre for Disease Prevention and Control (ECDC), Stockholm, Sweden

Mike Catchpole is a medical doctor who has worked in infectious disease epidemiology and response at national and international levels since 1991. He is Chief Scientist at the European Centre for Disease Prevention and Control (ECDC). Prior to that, he was Director of Public Health England’s national Centre for Infectious Disease Surveillance and Control, and was the UK member of the ECDC Advisory Forum from 2007 until 2014.

He has over 20 years’ experience of management of communicable disease surveillance and response, including leadership of the national epidemiological response to the 2009 influenza A(H1N1) pandemic in England, leading the public health follow-up of those exposed to the terrorist bombings in London in 2005, and developing and managing the surveillance systems for the 2012 London Olympics, as well as the surveillance systems that were instrumental in driving the dramatic reductions in MRSA and *C. difficile* in England.

His primary research interests have included HIV and other sexually transmitted infections, the wider health effects of major incidents and public health information systems development. He has also been a member of the steering groups for a number of European projects, and chaired the Steering Committee of the European Programme for Intervention Epidemiology Training (EPIET) from 2001 to 2006.

He has academic appointments as a visiting professor at Imperial College London and City University London.
Christian Drosten, Charité Berlin, Berlin, Germany

Christian Drosten (born 1972, Lingen, Germany) is a physician by training, board certified in virology, medical microbiology and infection epidemiology. He started his professional career at the Bernhard Nocht Institute for Tropical Medicine in Hamburg, where he discovered the unknown virus causing severe acute respiratory syndrome (SARS) in 2003 and developed a diagnostic test that enabled public health authorities worldwide to stop a beginning pandemic.

In 2007, at age 34, he became the founding director of the Institute of Virology at University of Bonn Medical Centre, now one of the most well-known places for research on emerging viruses in Germany. His group has several active research projects in Africa and Latin America. In March 2017 he took over the Chair of Virology at Charité, Berlin, where he heads the Institute of Virology on Campus Mitte.

Drosten has co-authored more than 300 peer-reviewed papers and coordinated research consortia funded by the European Union, Deutsche Forschungsgemeinschaft and the German Ministry of Research. He is a member of the internal advisory board of the German Center for Infection Research (DZIF) and the speaker of the German National Research Network for Zoonotic Infections. He received the German Federal Cross of Merit for his work to counter the SARS epidemic. As a professor at one of the largest university medical centres in Europe, he is intensely engaged in collaborative clinical and basic research to limit the threat of emerging infections and pandemics.
Karl Ekdahl is a medical doctor and a specialist in infectious diseases. He has a PhD in Infectious Diseases from Lund University, Sweden, a Diploma in Tropical Medicine and Hygiene from Prince Mahidol University, Bangkok, Thailand, and a master’s degree in Epidemiology from the London School of Hygiene and Tropical Medicine.

In 1999 he became Associate Professor and in 2007 Adjunct Professor in Infectious Disease Epidemiology at the Karolinska Institute in Stockholm. In his academic career he has authored some 100 scientific articles and one book, and has tutored 10 PhD students. Between 2007 and 2011 he was the Editor-in-Chief of the European Centre for Disease Prevention and Control (ECDC)-published scientific journal *Eurosurveillance*.

After some years as an infectious disease specialist, Professor Ekdahl entered the area of communicable disease prevention and control in 1995. Since then, he has worked at regional, national and international levels, and between 2001 and 2005 he held the position of Deputy State Epidemiologist for Sweden. He has participated in many international networks: an HIV surveillance project in China, and was responsible for Swedish cooperation with Russia and the Baltic Republics on communicable disease control from 1998 to 2000. In March 2005, Professor Ekdahl was the first expert to join ECDC.

Within ECDC, he has been Strategic Adviser to the Director (2005–07) and Head of the Health Communication Unit (2007–10). From February to April 2010, Professor Ekdahl was the Centre’s Acting Director, from June 2010 he was the Head of the Communication and Country Cooperation Unit and since April 2011 he is the Head of the Public Health Capacity and Communication Unit.
David Heymann, Public Health England and London School of Hygiene & Tropical Medicine, London, United Kingdom

David Heymann is currently Professor of Infectious Disease Epidemiology, London School of Hygiene and Tropical Medicine and Head of the Centre on Global Health Security at Chatham House, London. From 2012 to March 2017 he was chairman of Public Health England, United Kingdom (UK). Previously, he was Executive Director of the World Health Organization (WHO) Communicable Diseases Cluster, during which he headed the global response to severe acute respiratory syndrome (SARS), and prior to that he was director for the WHO programme on Emerging and other Communicable Diseases.

Earlier experiences at WHO include as chief of research activities in the WHO global programme on AIDS. Before joining WHO he worked for 13 years as a medical epidemiologist in sub-Saharan Africa, on assignment from the US Centers for Disease Control and Prevention (CDC), where he participated in the first and second outbreaks of Ebola hemorrhagic fever and supported ministries of health in research aimed at better control of malaria, measles, tuberculosis and other infectious diseases. Prior to joining the CDC, he worked in India for 2 years as a medical epidemiologist in the WHO smallpox eradication programme.

He is an elected fellow of the Institute of Medicine of the National Academies (United States) and the Academy of Medical Sciences (UK), and has been awarded several public health awards that have provided funding for the establishment of an ongoing mentorship programme at the International Association of Public Health Institutes (IANPHI). In 2009, he was appointed an honorary Commander of the Most Excellent Order of the British Empire (CBE) for service to global public health.
Dr Susan Hopkins was appointed as the Interim Chief Medical Advisor at NHS Test and Trace and the Strategic Response Director for COVID-19 at Public Health London (PHE), United Kingdom (UK) in August 2020. Dr Hopkins was an Incident Director within PHE’s COVID-19 incident response from January to August 2020.
Previously she was the Deputy Director, National Infection Service of PHE, leading on healthcare-associated infections and antimicrobial resistance, Clinical Director of Infection Services at the Royal Free London NHS Foundation Trust.
Dr Hopkins was appointed in 2006 as a consultant in infectious diseases and microbiology, leading the hospital epidemiology programme at the Royal Free and continues to practice clinically. She trained in infectious diseases, microbiology and epidemiology in Ireland, the United States, France and the UK.
She holds honorary academic appointments at University College London and Imperial College London. She holds current research funding (as co or lead investigator) of approximately 20 million GBP with research partners across the UK.
Irena Klavs, National Institute of Public Health, Ljubljana, Slovenia

Dr Irena Klavs is a medical epidemiologist working in the area of surveillance, research, prevention and control of communicable diseases. Currently she serves as a head of the HIV, STIs and hepatitis group and as a head of the Healthcare-associated infections group in the Communicable Disease Centre at the National Institute of Public Health in Slovenia. She is a member of the National AIDS Committee, a member of the National Committee for Prevention and Control of Healthcare-Associated Infections at the Ministry of Health and a member of the HIV, Hepatitis and Tuberculosis Think Tank at the European Commission.

She has been a principal investigator for several Slovenian national surveys, including Sexual attitudes, behaviour and health survey (2000) and National healthcare-associated infections survey in acute care hospitals (2011). Since 2005, she has been a member of the European Centre for Disease Prevention and Control (ECDC) Advisory forum for Slovenia. Since 2008, she has been coordinating the European Programme for Intervention Epidemiology Training (EPIET) at the National Institute of Public Health in Slovenia, one of the EPIET training sites. Currently she is Associated Professor at the Department of Public Health at the Medical Faculty, University of Ljubljana and Honorary Senior Lecturer at the London School of Hygiene and Tropical Medicine at the University of London. Dr Klavs graduated from the Medical Faculty, University of Ljubljana, and has a MSc in Epidemiology and a PhD from the London School of Hygiene and Tropical Medicine, University of London.
Karl Kristinsson, Landspitali University Hospital and University of Iceland, Reykjavik, Iceland

Karl Kristinsson graduated as a medical doctor from the University of Iceland and received specialist training in Clinical Microbiology in the United Kingdom at the Glasgow Royal Infirmary, Glasgow, Royal Hallamshire Hospital, Sheffield and Northern General Hospital, Sheffield. Following the membership examination from the Royal College of Pathologists (MRCPath), he is now a fellow, FRCPath. He has a PhD from Sheffield University on Coagulase Negative Staphylococci and Foreign Body Associated Infections. He was a Research Fellow at Cologne University, Hygiene Institut, in 1988; since this time, he has worked as a consultant at the Clinical Microbiology Laboratory, Landspitali, University Hospital and since 1999 he has been head of the laboratory.

From 1988, Professor Kristinsson was an associate professor in clinical microbiology, University of Iceland, and has been a full professor since 2000. He has been a National Microbiology Focal Point and Antimicrobial Resistance Focal Point for Iceland at the European Centre for Disease Control (ECDC) since the Centre’s founding. In addition, he is an Associate editor for *Eurosurveillance* and is on the editorial board of *Infectious Diseases* (formerly *Scandinavian Journal of Infectious Diseases*). Professor Kristinsson was also President of the Nordic Society for Clinical Microbiology and Infectious Diseases (2010–12) and Vice chairman of the Communicable Disease Committee for Iceland.

His research has mainly focused on pneumococci, pneumococcal infections, *Streptococcus pyogenes*, streptococcal infections, *Staphylococcus aureus* and staphylococcal infections and meningococci, with an emphasis on antimicrobial resistance, molecular epidemiology and pathogenicity. Current studies include a longitudinal study on the effects of pneumococcal vaccination on the molecular epidemiology of pneumococci and epidemiology of pneumococcal infections. Also, a molecular study on macrolide resistance in *Streptococcus pyogenes*. 
Jacob Moran-Gilad, Ministry of Health, Jerusalem and Ben-Gurion University of the Negev, Beer-Sheva, Israel

Jacob Moran-Gilad is a board-certified consultant clinical microbiologist and public health / medical epidemiologist. He is the principal investigator of the MAGICAL group (Microbiology, Advanced Genomics and Infection Control Application Laboratory) at the Faculty of Health Sciences, Ben-Gurion University (BGU). His current research involves the development and validation of laboratory methods for rapid diagnosis of infectious diseases, the study of the molecular epidemiology of various pathogens of public health interest and the integration and application of new methods in health protection, using advanced genomics and metagenomics. He is also involved in research on public health microbiology policy and planning, and in exploring contemporary approaches for linking up medical epidemiology and cutting-edge microbiology to inform public health strategy.

As a senior consultant to Israeli Ministry of Health, he has been focusing on national strategy and policy-making in public health microbiology. In this capacity, he is the Chair of the National Advisory Committee for Microbiology and involved in several national infectious disease programmes, and in emergency preparedness and response. Professor Moran-Gilad is also the lead Clinical Microbiologist at Soroka University Medical Center, a 1,200-bed tertiary-care regional medical centre in Southern Israel and Scientific Director of the institutional bio-bank. At international level, Professor Moran-Gilad is the immediate-past Chairperson of the ESCMID Study Group for Genomic and Molecular Diagnostics (ESGMD), member of the board of the ESCMID Study Group for Legionella Infections (ESGLI) responsible for microbiology and genomics and Chair of the International Working Group for whole genome sequencing of Legionella. Recently, he was appointed as the Deputy Programme Director and the designate Programme Director of ECCMID, the world’s leading conference on microbiology and infection.

Jacob has published significantly in his areas of expertise and is a principal- or co-investigator in many funded research projects nationally and internationally, including the
European Union Horizon 2020 and the Joint Programming Initiative on Antimicrobial Resistance (JPIAMR), and the Swiss National Centres of Competence in Research (NCCR) framework.
Chantal Reusken, Centre for Infectious Disease Control of the Dutch National Institute for Public Health and the Environment, Bilthoven, the Netherlands

Chantal Reusken works as Expert Virology at the Centre for Infectious Disease Control of the Dutch National Institute for Public Health and the Environment (RIVM) in Bilthoven. She has an academic appointment at the Viroscience department at Erasmus University Medical Centre in Rotterdam. Dr Reusken has worked in the field of virology since 1992, with a focus on the Public Health perspective since 2005. She holds a PhD from Leiden University.

Dr Reusken worked for 5 years as a group leader at Public Health Virology in Rotterdam and before that for 9 years at the Netherlands Centre for Infectious Disease Control, the last 3 years of which she was head of the unit for rare and emerging viral diseases and laboratory response at the RIVM. She is coordinator of the European Centre for Disease Prevention and Control (ECDC)-funded European expert laboratory network for emerging viral diseases (EVD-LabNet). Furthermore, Dr Reusken regularly serves as an expert on international committees and consultant groups of organizations such as ECDC, United Nations Children’s Fund, Global Outbreak Alert and Response Network, Global Research Collaboration for Infectious Disease Preparedness and the World Health Organization.

Her activities focus on emerging viral disease laboratory preparedness and response; as such, she works at the research-diagnostics interphase. She is passionate about and actively involved in global laboratory capacity and capability building as a key activity for successful Public Health and clinical preparedness and response to emerging viruses. Her research has a focus on pathogens moving at the animal-human interphase like arboviruses, rodent-borne viruses, hemorrhagic fever viruses and MERS-CoV. She has been involved in numerous European projects as partner and/or task leader. She has more than 130 international peer-reviewed publications, including some hallmark papers on the epidemiology of MERS-CoV,
the zoonotic potential of Schmallenberg virus and laboratory preparedness and response research.
Panayotis T. Tassios was born in 1967 in Athens, Greece. He studied Biochemistry and Molecular Biology in the United Kingdom, Education in Greece and currently works as Associate Professor in Molecular Microbiology at the National and Kapodistrian University of Athens. His research focuses on the molecular typing of bacterial strains and their resistance mechanisms to antimicrobial drugs, in order to assist infection surveillance, management and control.

Since 1990, he has co-authored over 75 original articles in peer-reviewed journals. Since 1997, he has been active in more than 10 international research projects and networks, their subjects covering both community-acquired and healthcare-associated infections; served as Chairperson and/or Secretary in two study groups (Epidemiological Markers and Food- and Water-borne Infections) of the European Society of Clinical Microbiology and Infectious Diseases (ESCMID); and sat on the Scientific and Organising Committees of several international scientific conferences (e.g. European Scientific Conference on Applied Infectious Disease Epidemiology (ESCAIDE) from 2007 to 2016 and International Meeting on Microbial Epidemiological Markers (IMMEM) in 2009 and 2010).

His interest in the collaborative nature of scientific research and the public health aspect of infectious diseases, together with his love of education and group work, have nurtured his continuing practice in teaching—at undergraduate, postgraduate and lifelong levels—both in Greece and at international workshops, seminars and conferences relating to both molecular microbiology and scientific writing. He has been an Associate editor of Eurosurveillance since 2007, has held a similar position at Clinical Microbiology and Infection since 2003 and has been reviewing manuscripts for over 10 journals since 2000.
Hélène Therre holds a PhD in Biology (Option Reproduction) obtained in 1988 from the University Paris VI, France and has studied as a science journalist at University Paris VI. After a few years working as an independent science journalist for various French and European scientific journals and agencies, she joined the team of Biofutur, a French European biotechnology magazine, in 1993.

In 1998, she joined the European Center for AIDS Surveillance and then the French National Institute for Public Health Surveillance (InVS) as editor-in-chief of *Eurosurveillance* monthly. She participated in the process leading to the listing of *Eurosurveillance* in MedLine.

At the time of the European Centre for Disease Prevention and Control’s creation and *Eurosurveillance*’s migration to ECDC in 2007, she became Associate editor of the journal, while being in charge of the scientific promotion within the Scientific Department of InVS. Since the creation of Santé publique France (merger of InVS and the French National Institute for Prevention and Health Education (Inpes)), she has been responsible for the scientific promotion unit within the Communications Division. Dr Therre worked on guidelines related to scientific publication and participated in working groups on Open Access, social inequalities in health and prospective studies by 2030. She is also a member of the editorial team of the French Weekly Epidemiological Bulletin (BEH) and *Santé en Action*, a French journal of prevention and health promotion.
Henriette de Valk, Santé publique France, Paris, France

Dr Henriette de Valk is a medical epidemiologist at the French National Public Health Agency (Santé Publique France). As the head of the Foodborne, Vectorborne and Zoonotic Infections Unit she is in charge of surveillance, outbreak investigations and applied research. Dr de Valk is actively involved in European networking activities for surveillance of infectious diseases, as a national representative in supranational surveillance networks, as a member of the coordination group of the Vectorborne and Emerging Diseases network of the European Centre for Disease Prevention and Control (ECDC) and as supervisor in the European Programme for Intervention Epidemiology Training. She recently worked on guidelines for surveillance of emerging arboviruses, on the disease burden of foodborne intestinal infectious diseases and on whole genome sequencing for surveillance. She is serving on the national committee nominating the National Reference Centres (laboratories) for infectious agents in France and in Belgium.

Dr de Valk graduated from the University of Leyden in the Netherlands, the London school of Hygiene and Tropical Medicine in the United Kingdom and the Institut for Tropical Medicine in Antwerp, Belgium and is an alumnus of The European Programme for Intervention Epidemiology Training. Prior to coming to the Santé Publique France she worked for the NGO Médecins Sans Frontières (Doctors Without Borders) in emergency relief programmes in Sudan, Uganda and Mali, for the German Technical Cooperation (GTZ) in Cameroon and for the World Health Organization in Indonesia at the control programmes for diarrhoeal diseases and respiratory infections.
Marieke van der Werf, European Centre for Disease Prevention and Control (ECDC), Stockholm, Sweden

Marieke J. van der Werf is head of section Sexually transmitted infections, blood-borne viruses and tuberculosis at the European Centre for Disease Prevention and Control (ECDC) in Stockholm. She trained as a biomedical scientist and medical doctor at the University of Leiden, the Netherlands, did her Master of Public Health in 2001 at the Netherlands School of Public Health and obtained her PhD in Medicine at the Erasmus University in Rotterdam.

In 1998, she worked at the municipal health service in Amsterdam on the HIV cohort studies. Thereafter, she joined the non-profit organisation KNCV Tuberculosis Foundation as head of unit Research and head of unit Knowledge Management, Research and Policy Development. Apart from heading the unit she provided technical assistance and built capacity for epidemiological and operational research on tuberculosis in Europe, Africa and Asia. In 2012 she joined ECDC as head of disease programme Tuberculosis. In this and other functions at ECDC she coordinated the European Union guidance, development, surveillance, and training on sexually transmitted infections, blood-borne viruses and tuberculosis.

She (co-)authored over 150 articles in international peer-reviewed journals. She participates in the work of international policy advisory groups and guidance developments groups from the World Health Organization and other organizations.
Sylvie van der Werf, Institut Pasteur, Paris, France

Sylvie van der Werf is a Professor at the University Paris Diderot, where she is responsible for a master’s program in Immunology, microbiology, virology and infectious diseases. She is the Head of the Molecular Genetics of RNA Viruses Unit at the Institut Pasteur, as well as the Director of the coordinating centre of the National Reference Centre for Respiratory Viruses, the World Health Organization (WHO) National Influenza Centre (Northern-France) and the WHO H5 Reference Laboratory. Furthermore, she is the Director of the department of Infectiology-Microbiology of the Doctoral School Bio-Sorbonne Paris Cité.

Professor van der Werf is a member of several professional bodies and societies: American Society of Microbiology, Society for General Microbiology, European Society of Clinical Microbiology and Infectious Diseases, International Society for Influenza and other Respiratory Viruses and the European Scientific Working Group on Influenza. She is regularly requested to serve as an expert on various committees of international organizations, such as the WHO and the European Centre for Disease Prevention and Control.

Professor van der Werf’s research interests have been focused on respiratory viruses since 1996, particularly dealing with molecular epidemiology and molecular genetics, aimed at the identification of determinants of influenza virus evolution, species specificity and sensitivity to antivirals. She is the author of over 160 scientific papers. She was awarded the Georges Zermatti prize in 2006 and was nominated ‘Chevalier de l’Ordre des Palmes Académiques’ in 2009.
Maria Paulke-Korinek graduated from the Medical University of Vienna, Austria, in 2005 and afterwards was a resident physician at the Department of Specific Prophylaxis & Tropical Medicine, Medical University Vienna, in the working group ‘Epidemiology and Travel Medicine’. Her focus was on the epidemiology of vaccine-preventable diseases, the evaluation of vaccination recommendations and the effects of vaccination programs. She was also working in numerous clinical trials investigating vaccines, as well as seroprevalence studies evaluating protection after vaccinations, e.g. with hexavalent paediatric vaccines, tick-borne encephalitis vaccines, pandemic vaccines and vaccines against Japanese Encephalitis.

After her diploma in tropical medicine from the Bernhard Nocht Institute for Tropical Medicine in Hamburg, Germany in 2010, she became a specialist for specific prophylaxis and tropical medicine accredited by the Austrian Medical Association. Maria finished her PhD studies at the Medical University Vienna in 2011, with her doctoral thesis on ‘Vaccination recommendations and epidemiology of vaccine-preventable diseases in Austria’. She habilitated in 2014, investigating the effects of the rotavirus national immunization program in Austria. Since April 2015, she has been the head of the Department for Vaccines at the Austrian Ministry of Health and Women’s Affairs. She has published 25 articles in peer-reviewed journals, contributed to eight reviews and book chapters and has reviewed articles for 10 scientific journals.
Belgium: Tinne Lernout, Sciensano, Brussels

Tinne Lernout is a medical doctor with a specialisation in tropical medicine and a master’s degree in Public Health. She started her career as a general practitioner in Belgium. After a few years of working as a general practitioner and with humanitarian projects in Africa, she gained interest in the epidemiology of infectious diseases. Since 2002, she has been working as an epidemiologist in different institutions, namely the Scientific Institute of Public Health (WIV-ISP) in Belgium, the French Institute of Public Health (InVS/Santé publique France) in Mayotte, a French overseas department, and the Centre for the Evaluation of Vaccinations at the University of Antwerp, Belgium.

She has experience in surveillance, field epidemiological investigations and outbreak control in the area of infectious diseases, mainly in vaccine-preventable, vector-borne and zoonotic diseases. She has also been involved in the planning, implementation and scientific validation of several studies, including vaccination coverage surveys and seroprevalence studies. She is currently employed as an epidemiologist at the Belgian health institute for Sciensano (previously WIV-ISP), where she is in charge of the coordination of the Environmental related infectious diseases unit, with a special focus on tick-borne diseases.
Bosnia and Herzegovina: Sanjin Musa, Institute of Public Health of the Federation of Bosnia and Herzegovina, Sarajevo

Dr Sanjin Musa is a medical doctor and epidemiologist, currently working as a Head of the Department of Epidemiology in the Institute for Public Health of the Federation of Bosnia and Herzegovina and as Associate Professor of Epidemiology in the Sarajevo Medical School of the Sarajevo School of Science and Technology University.

After graduating from the Faculty of Medicine at the University of Sarajevo in 2005, and completing one year of internship at the University of Sarajevo Clinical Center, he worked for 3 years as a general practitioner at the Primary Health Care Center Sarajevo. Since October 2009 he has been working at the Institute of Public Health of the Federation of Bosnia and Herzegovina, first as a resident, then as a specialist in epidemiology and immunisation programme manager in the Federation of Bosnia and Herzegovina. Dr Musa received his MSc and PhD degrees in medical sciences from the University of Sarajevo.

He participated in numerous research projects related to HIV, tuberculosis, influenza, immunisation and vaccine-preventable diseases, and COVID-19.
Bulgaria: Iva Christova, National Center of Infectious and Parasitic Diseases, Sofia

Dr Iva Christova is Professor of Microbiology at the National Centre of Infectious and Parasitic Diseases in Sofia. She is a specialist in vector-borne disease epidemiology, laboratory diagnosis and clinical manifestations. For many years she worked on Lyme borreliosis, human granulocytic anaplasmosis, Crimean-Congo haemorrhagic fever, haemorrhagic fever with renal syndrome, West Nile fever and emerging vector-borne infections, as well as leptospirosis and listeriosis. The main goals were optimizing diagnostics and elucidation of ecology, epidemiology and immunology. As a visiting researcher, she has done scientific work in Germany, The Netherlands and the United States.

At present, she is the Bulgarian National Microbiology Focal Point.
Sanja Kurečić Filipović, MD, PhD graduated from the Medical School, University of Zagreb in 1995. From 1996 to 1998 she worked as an intern. From 1998 to 2007 Sanja worked in the pharmaceutical industry, holding different positions within the medical department, ending as a Medical and Regulatory Manager responsible for medical activities in Croatia and neighbouring countries. She joined the Croatian Institute of Public Health (CIPH) in 2007 as an epidemiologist. Currently Sanja holds a position as Head of the Department for Communicable Disease Surveillance at CIPH. She has received a master's degree in Natural Sciences, Biomedicine and in 2016 she received a PhD degree in epidemiology at the Medical School, University of Zagreb. Sanja has been working on several projects, from those involving mainly vaccination to those related to the surveillance of communicable diseases. She is a member of the Croatian Medical Chamber, a member of the Croatian National Immunization Technical Advisory Group (NITAG) and a member of the Advisory Forum of the European Centre for Disease Prevention and Control (ECDC). Sanja attended several international training courses related to clinical trials, epidemiology, and vaccination. In 2019 she finished the Advanced Course of Vaccinology.
Linos Hadjihannas is an Internal Medicine and Infectious Diseases specialist. He has a PhD in Infectious Diseases from the Medical School of the University of Athens.

Currently he serves as consultant in Infectious Diseases at Nicosia General Hospital and as Head of the National Program for Antimicrobial Resistance and Healthcare-Associated Infections at the Unit of Surveillance and Control of Communicable Diseases of the Ministry of Health of Cyprus. Prior to that, he was the coordinator of HIV/AIDS, TB and sexually transmitted infections (STI) Program. Since 2018, he is Cyprus member of the Advisory Forum of the European Centre for Disease Prevention and Control (ECDC).

His research interests include infection prevention and control, epidemiology of healthcare-associated infections and antimicrobial stewardship.

He has academic appointments as a Special Scientist at the University of Cyprus Medical School.
Jan Kynčl has been based at the Department of Infectious Disease Epidemiology, National Institute of Public Health in Prague since 1998, and currently serves as its Head. He received his Diploma MD and PhD degree in preventive medicine from the Third Faculty of Medicine, Charles University in Prague and postgraduate diploma in public health and epidemiology from the Institute for Postgraduate Medical Education in Prague.

He is a member of the European Influenza Surveillance Network (EISN, formerly EISS) and alternate member of the European Commission Health Security Committee, where he represents the Czech Republic. He is also a member of the European Centre for Disease Prevention and Control (ECDC) Advisory Forum.

In the Czech Republic, he holds a number of positions in public health and epidemiology. He is a member of the Central Epidemiological Committee and a member of the Chief Medical Officer's Advisory Committee for Epidemiology. Within the Czech Medical Society of J.E. Purkyne, he is a member of the executive board of the Czech Vaccinological Society, as well as a member of the executive board of the Society for Epidemiology and Microbiology. Since 2007, he has been a part-time senior lecturer at the Department of Epidemiology, Third Faculty of Medicine, Charles University in Prague. He is the author of more than 50 papers and one monograph.
Denmark: Peter Henrik Andersen, Statens Serum Institut, Copenhagen

Peter Henrik Andersen was trained as a physician and in public health and holds a specialist diploma in both fields. He has been working in the Department of Infectious Disease Epidemiology and Prevention at Statens Serum Institut since 2000, and as a senior medical officer since 2004.

He is the editor of the national epidemiological bulletin EPI-NEWS, and has a special interest in the field of vaccine-preventable diseases. In this capacity, he is an expert member of the National Immunization Technical Advisory Group (NITAG) under the Danish Health Authority and is leading the Vaccination Committee at Statens Serum Institut.

He is responsible for updating national guidelines for preventing infectious diseases in travellers and is leading the call centre in the Department of Infectious Disease Epidemiology and Prevention, giving oral and written advice to healthcare personnel on the use of vaccines, as well as in the prevention and control of infectious diseases.

Parallel to his work in infectious diseases epidemiology and public health, he has kept a link to the clinical field, and is currently a part-time consultant at the emergency department of a major Copenhagen hospital.
Mari-Anne Härma was appointed as the Acting Director General for the Estonian Health Board in September 2021. During this appointment she has been responsible for the strategical and operational leading of the nationwide COVID-19 healthcare crisis, being an advisor and national spokesperson for COVID-19 epidemiology. Before that, she was the Deputy Director General for the Estonian Health Board, overseeing the surveillance, prevention, and control of communicable diseases and of the healthcare system performance in Estonia, during COVID-19 pandemic. Before joining the Estonian Health Board in January 2020, she worked in Helsinki, Finland, with the world’s leading project on diabetic nephropathy - Finnish Diabetic Nephropathy (FinnDiane) Study, investigating the role of genetics in infections in type 1 diabetes and diabetic nephropathy. She is trained in clinical research, genetics, molecular genetics and immunology in Finland and in Estonia.
Sohvi Kääriäinen is a medical doctor and a specialist in Paediatrics and in Paediatric Infectious Diseases. She holds a PhD from Oulu University in Finland. Her PhD research topic was epidemiology of hospital-associated infections in pediatrics with a focus on viral infections and infection control. She has a master’s degree in Health Sciences (International Health) from Tampere University in Finland.

Dr Kääriäinen has completed the European Programme for Intervention Epidemiology Training (EPIET) at the Finnish Institute for Health and Welfare in Helsinki, Finland. Currently she is a Senior Physician working in the fields of surveillance of respiratory infections, hospital-associated infections, antimicrobial resistance and tuberculosis at the Finnish Institute for Health and Welfare. Prior to this position she got experience in clinical medicine in the fields of pediatrics, infectious diseases and infection control in healthcare.

Her areas of expertise include hospital-associated infections and infection control, antimicrobial resistance, surveillance of communicable diseases and outbreak investigations.
Valérie Colombani-Cocuron graduated from the National Veterinary School of Lyon (now VetAgro Sup) in 1999 and from the internship in pet medicine and surgery in 2002. Ms Colombani-Cocuron practiced for 2 years in several veterinary clinics. After working in parallel for a few years for the Nouvelles Editions vétérinaires et alimentaires (NEVA), she joined Les Editions du Point vétérinaire in 2006 as editor-in-chief of Le Point vétérinaire and Pratique vétérinaire équine, two French peer-reviewed journals of veterinary medicine. In 2019, she joined Santé publique France as editor-in-chief of the Bulletin épidémiologique hebdomadaire (BEH), a peer-reviewed journal that publishes articles submitted by national public health experts. Ms Colombani-Cocuron is leading the BEH team in the scientific promotion unit of the Communication Department at Santé publique France.
Dr Maren Winkler studied medicine at Charité Berlin. After graduating, she gained clinical experience as a resident in urology before switching medical fields to work as a study physician for the research group ‘Translation in Stroke Research’ at the Charité Center for Stroke Research (CSB). After receiving her doctoral degree in 2012, she continued to work as a neuroscientist with a research focus on brain injury depolarizations and delayed cerebral ischemia following aneurysmal subarachnoid haemorrhage.

In addition to her research work, Dr Winkler was the scientific coordinator for the ‘MSc Cerebrovascular Medicine’ programme at the CSB. She conceptualised and developed a prototype for the master programme’s eLearning tool and became increasingly interested in science communication and scientific editing.

In January 2021, she became a scientific editor of the Epidemiological Bulletin and the Bundesgesundheitsblatt at the Robert Koch Institute in Berlin.
Greece: Dimitrios Paraskevis, National and Kapodistrian University of Athens

Dr Dimitrios Paraskevis is an epidemiologist who holds a PhD in Molecular Epidemiology of viral infections from the Medical School of the National and Kapodistrian University of Athens. His PhD thesis was related to the prevalence of different HIV-1 subtypes and recombinants, and the dispersal patterns of the HIV-1 epidemic in Greece. Dr Paraskevis has been involved in molecular epidemiology studies of HIV, SARS-CoV-2 and other viruses; during the last 10 years he has focused on the applications of molecular epidemiology to public health. He is now an Associate Professor of Epidemiology and Preventive Medicine at Medical School of the National and Kapodistrian University of Athens, and he is a member of the National committee against COVID-19, as well as of the National Public Health committee of the Ministry of Health. Since October 2021, he has been assigned as the scientific advisor to the National Public Health Organization of Greece.

His research interests lie in the fields of epidemiology, public health, virology, molecular epidemiology, virus evolution, molecular diagnostics, applications of molecular epidemiology in the design and implementation of public health and therapeutic interventions, as well as viral resistance to antivirals. Dr Paraskevis is a member of twenty international and national scientific societies, and a member of the editorial board of four peer-reviewed scientific journals.
Hungary: Ágnes Hajdu, Ministry of Human Capacities, Budapest

Dr Ágnes Hajdu is a senior advisor at the Department of Hospital Hygiene and Communicable Disease Control in the Ministry of Human Capacities in Budapest, Hungary.

She has a wide range of interests in hospital epidemiology, infection control and antimicrobial stewardship. She is responsible for coordinating the national-level surveillance of healthcare-associated *Clostridium difficile* infections, and contributes to the development and revision of national recommendations for the prevention of healthcare-associated infections and antimicrobial resistance in Hungary. Dr Hajdu has made significant contributions to the planning, implementation and validation of the EU point-prevalence surveys on healthcare-associated infections and antimicrobial use in Hungary. Occasionally, she is involved in high-priority outbreak investigations in hospital settings. Currently, her work also focuses on promoting the use of health research in policy-making, as well as behaviour change interventions to improve antibiotic prescribing practices.

Her education background includes a Doctor of Medicine (MD) degree from the University of Pécs (2004) and a specialist degree in Public Health and Preventive Medicine from the Semmelweis University. She is an alumnus of the European Programme for Intervention Epidemiology Training (EPIET), for which she was seconded to the Department of Infectious Disease Epidemiology at the Norwegian Institute of Public Health in Oslo (2005–07). She served as an international ambassador of the Society for Healthcare Epidemiology of America (SHEA) in 2013.
Iceland: Már Kristjánsson, Landspítali National University Hospital, Reykjavík

Dr Kristjánsson is the Head of the Division of Infectious Diseases at the Department of Internal Medicine in Landspítali National University Hospital, Reykjavík since 2001. Before that, in 1997, he was appointed head of Infectious Diseases Department at Reykjavík City Hospital. Dr Kristjánsson graduated the Medical School at University of Iceland in 1984 and Post graduate and received training in Internal Medicine at the University of Connecticut (New Britain General Hospital) between 1987 and 1990, and in Infectious Diseases at Boston University Medical Center between 1990 and 1993.

Dr Kristjánsson’s main research interests include molecular epidemiology of staphylococci and Clostridium difficile among others. His recent research activity includes the molecular epidemiology and immune response to severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), post-coronavirus disease (COVID-19) health, antibiotic use in patients treated with biologicals as well as Staphylococcus bacteraemia.

Dr Kristjánsson is board certified by the American Board of Internal Medicine (1990) as well as the American Board of Infectious Diseases (1992).
Dr Joan O Donnell is a medical doctor and Specialist in Public Health Medicine at the national centre for the surveillance of infectious diseases in Ireland (Health Protection Surveillance Centre (HPSC)). She leads the respiratory infections division of the HPSC, with responsibility for the national coordination of the surveillance of influenza, legionellosis, respiratory syncytial virus, tuberculosis and other respiratory pathogens, e.g. MERS-CoV. She has been the project coordinator of the Influenza Monitoring of Vaccine Effectiveness in Europe (I-MOVE) project in Ireland since 2009.

She is a member of the European Centre for Disease Prevention and Control (ECDC) influenza, legionellosis and tuberculosis surveillance networks, the National Influenza Planning Steering Group and the influenza and legionellosis subgroups of the HPSC scientific advisory committee.

Dr O Donnell is a trainer in public health medicine with the Royal College of Physicians of Ireland Faculty of Public Health Medicine.
Paola de Castro has been the Director of the Publishing Unit of the Istituto Superiore di Sanità (National Institute of Health) in Italy since 2005. She is an active supporter of science communication to different stakeholders, scientific integrity, open science, health information literacy and gender equity in research. She promotes and carries on multidisciplinary research, cooperation and training for public health, mainly focused on communication, dissemination and use of healthcare information addressed to different targets in Europe, Latin America and Africa. She takes part in and organises conferences, workshops, exhibitions, science festivals and training courses on general and specific health-related issues, addressed to both researchers and the general public, including students.

De Castro is responsible for training in communication within the CASA project in Ethiopia (2014–), is Co-Chair of Gender Policy Committee of the European Association of Science Editors, is responsible for the School-Work Alternating System at ISS, is the Italian coordinator of the E-Bug project and was the Coordinator of the EU FP7 Project NECOBELAC (2009–12), a network of academic and research institutions in Europe and Latin America involved in research and training in scientific writing and open access publishing. She was also a member of the Italian task force of the FP7 MedOAnet project (2001–13), in support of Open Access policies in Southern Europe, and has been responsible for the Dissemination Unit of the Progetto Nazionale Amianto (National Asbestos Project) financed by the Italian Ministry of Health (2013–14), as well as projects of historical heritage in public health (e.g. history of public health, preservation of scientific instruments, oral memories, pictures).

De Castro is a Council member of the European Association of Science Editors (EASE) and co-chair of the EASE Gender Policy Committee; a country representative of HIFA2015 (Health Information for All by the year 2015); a member of the European Association of Health Information and Libraries (EAHIL), the Associazione Italiana Biblioteche (Italian
Library Association, AIB) and AISA (Italian Association for the Promotion of Open Science). She is on the editorial boards of *Annali dell’Istituto Superiore di Sanità, Eurosurveillance, European Science Editing, Open Journal of Bioresources, Revista CONAMED, Rare journal, Notiziario dell’Istituto Superiore di Sanità, I beni storico scientifici dell’Istituto Superiore di Sanità, Dispense per la Scuola, Rapporti ISTISAN* and *Istisan Congressi*. A selected list of her publication is available from: http://www.iss.it/site/attivita/ISSWEB_istituto/RicercaPersonale/dettaglio.asp?idAna=1070&lang=1.
Lul Raka is Associated Professor of Medical Microbiology and Infection Control at the University of Prishtina “Hasan Prishtina” in Kosovo. He also works as Medical Microbiologist at the National Institute of Public Health of Kosovo, Head of the National Program for Antimicrobial Resistance and Health Care-Associated Infections and President of Kosovo Society of Microbiologists.

Dr Raka earned his MD, Master’s degree and PhD from the University of Prishtina, Kosovo. Dr Raka was a State Department’s fellow at the University of South Carolina and of Fogarty International Center. He also served as Vice-Chair of Kosovo Accreditation Agency at the Ministry of Education and Science. During the Ebola outbreak in 2014, he was a World Health Organization consultant for infection prevention and control in Liberia.

During the coronavirus disease (COVID-19) pandemic he was Chairman of the Advisory Board for COVID-19 in the Ministry of Health. His fields of interest are antibiotic use and resistance, healthcare-associated infections and patient safety. Dr Raka is a member of various professional bodies on the national and international level and has published several articles in international journals.
Latvia: Dzintars Mozgis, Centre for Disease Prevention and Control, Riga

Dzintars Mozgis was born in Auce, Latvia on 14 July 1958. He graduated from the Riga Medical Institute faculty of paediatrics in 1982 as a medical doctor and started work as a paediatrician. After postgraduate training in paediatric surgery in 1987, he worked at University Children’s Hospital as a paediatric surgeon. In 1990 he visited and practiced at the Moscow Research Institute of Paediatrics and Paediatric Surgery; in 1992 at the University Hospital Eppendorf, Hamburg; in 1993 at the University Hospital Benjamin Franklin, Steglitz, Berlin and Rudolf-Virchow-Kinderkrankenhaus, Wedding, Berlin. In 1994 and 1995 he took part in in-service training courses in healthcare management held by the American International Health Alliance (AIHA). From 1995 to 2010 he was the CEO of the University Children’s Hospital in Riga.

Dr Mozgis completed his doctoral studies in 2002 and got a PhD in 2004; in addition, he worked part-time in the Riga Stradiņš University department for Public Health and Epidemiology as a lecturer from 2001, assistant professor from 2005 and associate professor from 2009. From 2013 to present he has been the Deputy Director for epidemiological safety and development in the Centre for Diseases Prevention and Control, Latvia. He has about 50 publications. His recent interests are related to antimicrobial resistance, healthcare and public health management, child injuries and medical history.
Luxembourg: Joël Mossong, Health Directorate (Direction de la Santé), Luxembourg

Following his PhD studies in mathematical epidemiology at Warwick University, Joël Mossong worked at the CRP-Santé (now Luxembourg Institute of Health) as a biostatistician before joining the National Health Laboratory (LNS) in 2003. He obtained competitive funding for several research projects in the area of molecular and statistical epidemiology of infectious disease including *Salmonella*, *Campylobacter* and human papillomavirus. Joël was the lead author on a large European social contact survey which was instrumental to calibrate currently used mathematical transmission models of COVID-19. During his time at the LNS his main interest was in the application of next generation sequencing to help detect, delineate and manage outbreaks of bacterial and viral pathogens. In 2021, he joined the Health Inspection to set up an epidemiological unit supporting the contact tracing activities. He was a member of several national steering committees set up to monitor and provide advice to the government during the COVID-19 pandemic focusing on schools, nursing homes and the large-scale testing programme. His main current focus is on estimating the impact of various control measures including quarantine and vaccination on COVID-19 outcomes in collaboration with international partners like the European Centre for Disease Prevention and Control (ECDC) and the World Health Organization (WHO).
Tanya Melillo is a medical doctor with a Masters in Health Services Management/Public Health and a PhD in Public Health. She has been heading the infectious disease prevention and control unit in Malta for the past 9 years. She is a lecturer at the University of Malta and lectures on disaster management, health management and infectious diseases. She is responsible for migrant health in her country and is presently working on a migrant health strategy. She is also responsible for preparing all health preparedness and response plans related to biological agents and generic preparedness. She is a member of the Royal Society for Public Health and of the Faculty of Public Health.
Dr Barbara Schimmer is a medical epidemiologist working at the Centre for Infectious Diseases, Epidemiology and Surveillance at the Dutch National Institute for Public Health and the Environment (RIVM). She worked for 10 years at the gastroenteritis and zoonotic infections unit carrying out surveillance projects, outbreak investigations and applied research. She will finish her PhD on ‘Q fever in a One Health context’ in 2018. Among other tasks, she is co-chair of the weekly early warning meeting and content chair of the annual Transmission Day gathering of around 300 Dutch public health professionals in the field of infectious diseases. She is an alumnus of the European Programme for Intervention Epidemiology Training (EPIET), for which she was based at the Department of Infectious Disease Epidemiology at the Norwegian Institute of Public Health in Oslo (2004–06).
Norway: Susanne Hyllestad, Norwegian Institute of Public Health, Oslo

Susanne Hyllestad is head of the department of zoonotic, food- and waterborne infections at the Norwegian Institute of Public Health. Her main fields of work at the institute are research and management. She holds a PhD in drinking water and public health, with a particular focus on prevention, detecting and responding to waterborne outbreaks. She has two master’s degrees – one in water engineering and one in social science on water as a human right. She has more than 20 years’ experience nationally and internationally in the official public health and municipal sector, engineering consultancy in the private sector, humanitarian water and sanitation fieldwork for Doctors without Borders, and as a special water and sanitation advisor for Norwegian Church Aid. In Norway, she is part of the editorial board of the Norwegian Water Association’s journal.
Portugal: André Peralta-Santos, Directorate General of Health, Lisbon

André Peralta-Santos is a consultant in epidemiology and information systems at the Directorate General of Health in Lisbon, Portugal. Between September 2020 and September 2021, he was the Director of Information and Analysis, responsible for the coronavirus disease (COVID-19) epidemiological analysis.

His career and interests have been moving towards the epidemiology of COVID-19, the quantitative impact of health policies through causal methods.

Dr Peralta-Santos is a Medical Doctor and Public Health Specialist, and holds a master's degree in Public Health, a clinical research certificate from Harvard Medical School and is currently pursuing a PhD at the University of Washington.
Dr Daniela Talapan is a medical doctor and Head of the Microbiology Laboratory at the leading National Institute of Infectious Diseases ‘Prof. Dr Matei Bals’ in Bucharest, Romania. She received her PhD in Microbiology on ‘The Emergence of Carbapenemase-producing Enterobacteriaceae and Their Impact on Antimicrobial Infections Therapy’ at the University of Medicine and Pharmacy ‘Carol Davila’ in Bucharest. In addition to her scientific and management responsibilities, she has been teaching microbiology at Carol Davila since 2008.

Her fields of interest are antimicrobial resistance in sessile and biofilm bacteria, healthcare-associated infections and new methods for improving diagnosis in biofilm-associated infections. She participated in numerous post-graduate ESCMID programmes in Switzerland, Finland, Italy, Spain and other European countries, as well as received advanced training on WGS at Berkeley University.

With the emergence of coronavirus disease (COVID-19), the Institute advanced testing methodologies and helped create the framework for population control to reduce the risk of further spread of the virus. As part of this focus, Dr Talapan’s team performed targeted research on bacterial co-infections in COVID-19-positive patients.
Slovakia: Lukas Murajda, Public Health Authority of the Slovak Republic, Bratislava

Lukas Murajda is a medical doctor with a specialization and PhD in public health, a master’s degree in applied epidemiology and a training for medical officers in Austria. He worked at the Jessenius Faculty of Medicine, Comenius University, Slovakia (2006–12) and was a fellow in the European Programme for Intervention Epidemiology Training (EPIET) at the State Health Office, Baden-Wuerttemberg, Germany (2012–14). Since 2015 he has been working as a medical officer in Austria, currently as a deputy chief medical officer of Land Salzburg. He was the Communication Person of the European Centre for Disease Prevention and Control Competent Body for Scientific Advice and Guidelines in Slovakia (2006–12).
Mario Fafangel is a medical doctor, public health specialist and EPIET alumnus. Currently, Dr Fafangel is the acting head of the Centre for Infectious Diseases of the Slovenian National Institute of Public Health (NIJZ). Dr Fafangel has long-standing experience (over 10 years) in outbreak management and field response both nationally and internationally, including in a World Health Organization field mission experience during the 2014 Ebola outbreak in Sierra Leone, and is currently in the forefront of coronavirus disease (COVID-19) response in Slovenia. He also has broad experience in vaccinology and biostatistics. He is an experienced lecturer for lay and professional audiences.
Spain: Josefa Masa Calles, National Centre of Epidemiology, Instituto de Salud Carlos III (ISCIII), Madrid

Josefa Masa-Calles is an epidemiologist who has worked at the National Centre of Epidemiology for more than 10 years, in charge of the National Vaccine Preventable Diseases (VPDs) Surveillance, including diseases under eradication and elimination plans (polio, measles and rubella).

She trained in medicine and public health at the Universities of Extremadura and Granada and in the Spanish Field Epidemiology Training Programme (PEAC) in Madrid.

Her research interests range from the evaluation of infectious disease surveillance systems and the eradication of polio, measles and rubella to the assessment of VPDs burden to the effectiveness of the vaccines included in the national vaccination program. She acts as an expert on vaccination programs for the Ministry of Health and for the European Medicines Agency. She’s a teacher at the Public Health National School and a Member of the Research Network in Epidemiology and Public Health (CIBERESP).
Dr Fehminaz Temel holds a medical degree from the Medical School of the Mediterranean University in Antalya, Türkiye. Since graduation she has worked as a general practitioner for 9 years. She started public health specialty training in 2003 and received her Public Health Specialization (PHS) certificate from the Department of Public Health, Medical School of the Hacettepe University, in Ankara Province, Türkiye in 2008. While obtaining her medical degree, she worked as a research assistant in Hacettepe University.

After receiving her PHS certification, she started the Epidemiology Fellowship program and completed the program as an epidemiologist in 2010.

Dr Temel worked in the Ministry of Health of Türkiye as a Public Health Specialist and an epidemiologist in the Epidemiology Unit until 2012. She has been working as the director of the Türkiye Field Epidemiology Training Program at the Early Warning Response and Field Epidemiology Department, which was established in March 2012 at the Public Health Institution of Türkiye, Ministry of Health.

Her fields of expertise include: epidemiology, outbreak investigations, early warning and response, communicable disease surveillance and vaccination programs.
Dr Danilo Lo Fo Wong is a veterinary epidemiologist with a PhD from the Royal Veterinary and Agricultural University, Copenhagen, Denmark and a MSc from the University of Wageningen, the Netherlands. For more than 20 years he has worked in the area of food safety and antimicrobial resistance (AMR) from a One Health perspective.

He is currently the Regional Adviser for the Control of Antimicrobial Resistance at the World Health Organization (WHO) Regional Office for Europe, Copenhagen, Denmark, where he coordinates AMR-related work to ensure a comprehensive implementation of the European strategic action plan on antibiotic resistance (2011–2022) and the global action plan on AMR (2015) in the 53 Member States of the European Region. Activity areas include: supporting national AMR action plan development, facilitating intersectoral coordination, strengthening surveillance of antimicrobial consumption and resistance, implementing infection prevention and control programmes, promoting antimicrobial stewardship, as well as supporting education, behavioural insight, advocacy and awareness campaigns, in collaboration with a large variety of partners, experts and networks.

Prior to that, Dr Lo Fo Wong performed research at the University of Guelph, Ontario, Canada (1993–1994) and the Animal Health Service, Deventer, The Netherlands (1994–1995). In 1999, he worked as a senior scientist at the Danish Zoonosis Centre, performing research and providing capacity building, both nationally and internationally, in epidemiology, risk assessment, source attribution, integrated surveillance, as well as outbreak detection and response. In 2007, he took up a position at the WHO headquarters in Geneva, Switzerland, as the coordinator of the WHO Global Foodborne Infections Network (GFN): a global epidemiology and laboratory capacity-building network. In 2011 he transferred to the WHO Regional Office for Europe in Copenhagen, Denmark, as Regional Adviser to setup and lead the AMR programme.
